

**DISTRICT GOALS**

In accordance with the budget cycle, the Board of Education will hold a special planning meeting to seek input from the public prior to establishing a set of written goals for the pending school year. After considering this input, as well as their own, the Board will establish goals for the upcoming year. For each of the goals, there will be corresponding indicators to be used in determining progress toward accomplishment of the goal.

The Board President will prepare a written report about the progress or accomplishment of the previous year’s goals and present the current goals to the residents of the school district as part of the packet prepared for the Annual Meeting, which is held on the fourth Wednesday of August.

On an ongoing basis the Superintendent will report to the Board the progress being made toward accomplishment of the goals adopted by the Board under this policy.
